

KERN E-Training

Equipment qualification

During the "equipment qualification for weighing instruments" (also called "facility qualification for weighing instruments"), you check whether the weighing instrument with the technology used is suitable for the intended tasks at your customer's site. This qualified measurement procedure may only be carried out by trained persons at the installation site of the device.

Training content

- ✓ Basics, aim and benefit of the equipment qualification and monitoring of non-automatic, electronic scales
- ✓ Control values and measurement techniques
- ✓ Carrying out a complete equipment qualification
- ✓ Creation and documentation of the Logbook for equipment qualification and handling of the application manual

Scope of service

- ✓ License for free access to the equipment qualification portal on kern-lab.com (software minimum sample weight according to USP protocol and logbook generator) for 2 years.
- ✓ Certificate of participation
